

Functional Structure of Episodic Memory

What Is Stored

- Aspects of Events
 - What: objects, people, actions, etc.
 - Where: spatial context
 - When: temporal context
 - How one felt/thought
- Bindings between above

How Processed

Hippocampus
indexing

Neocortex
consolidation

Predictive Function
Simulating future scenarios
Pattern completion
State inference

Brain Regions

- Medial temporal lobe
- Parahippocampal place area
- Insula, amygdala
- Default mode network
